

# PORTFOLIO

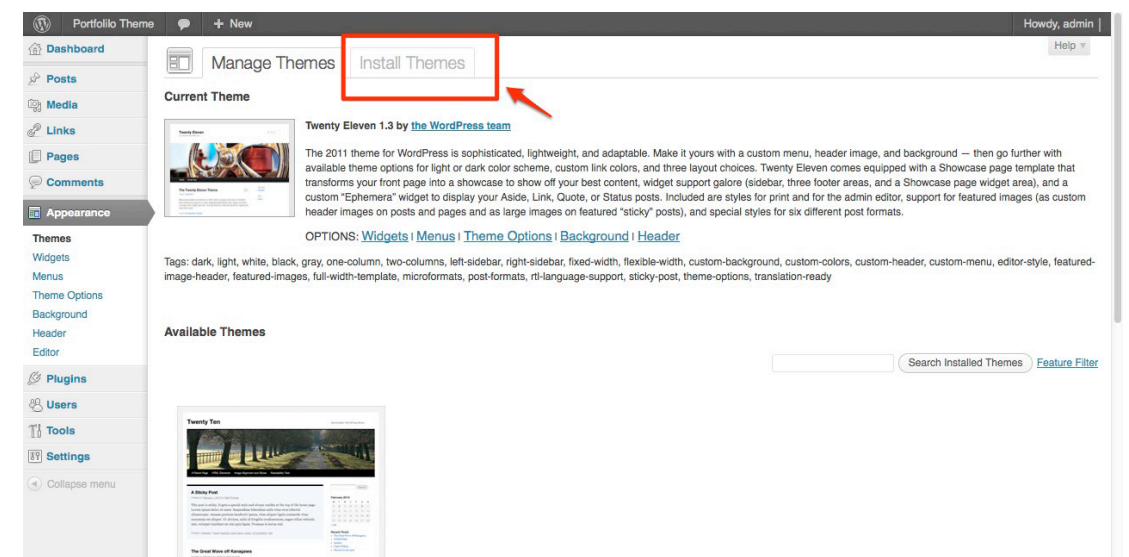

## DOCUMENTATION

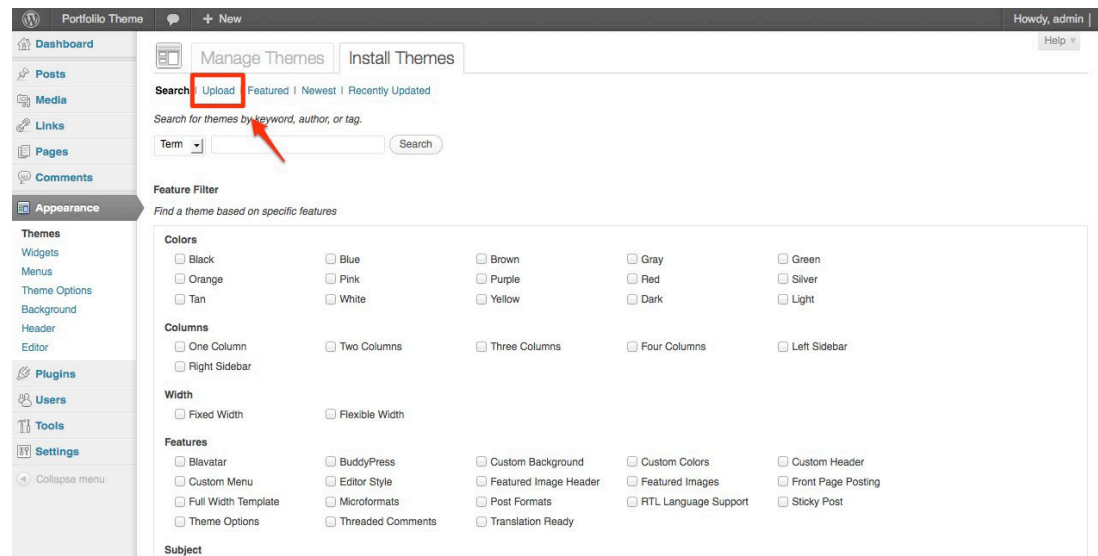

# INSTALLATION

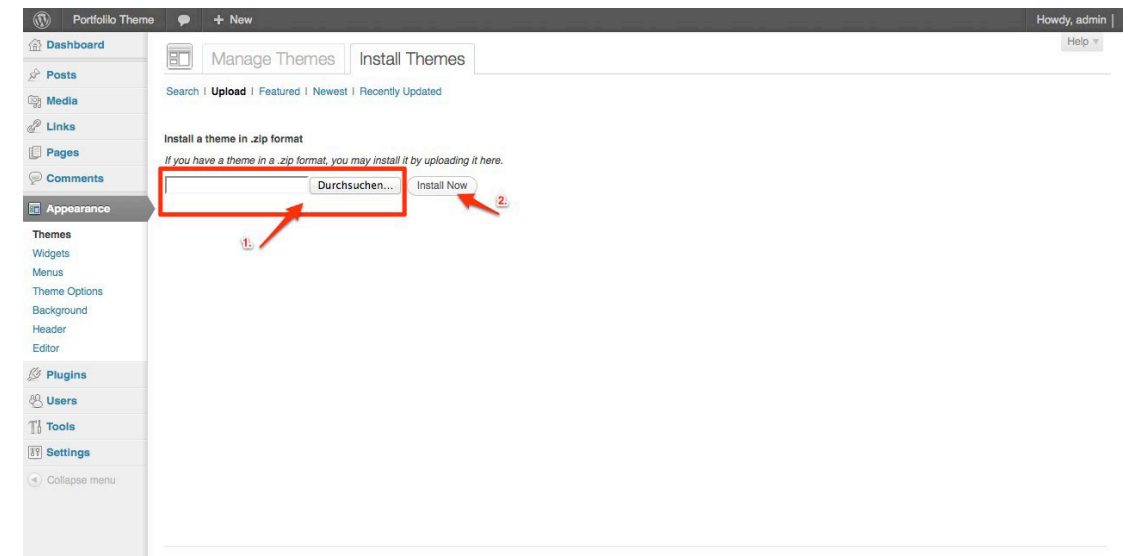

1. In your Wordpress Dashboard click on „Appereance“.

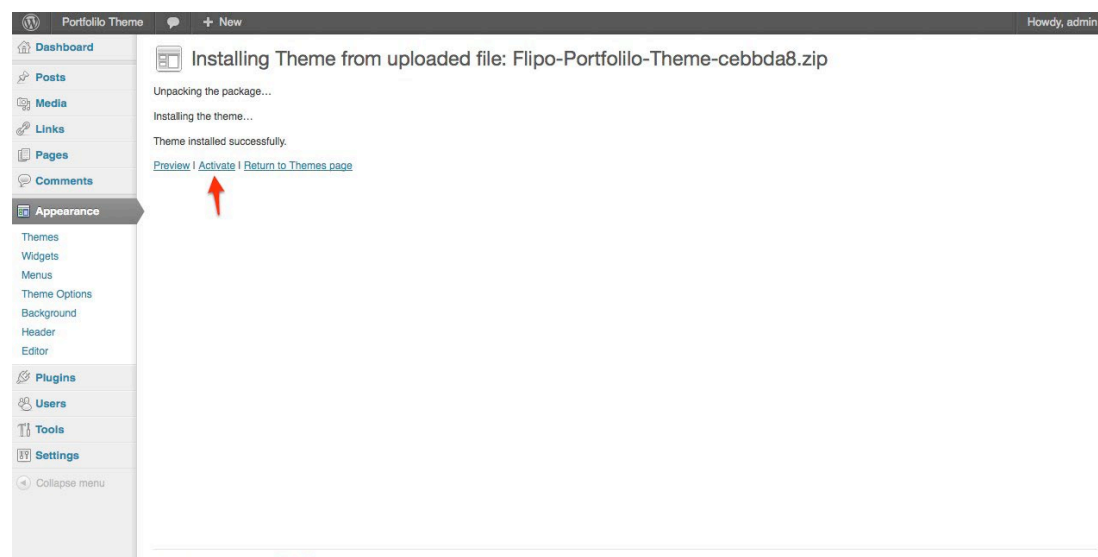

2. In the theme page click on „Install Theme“.

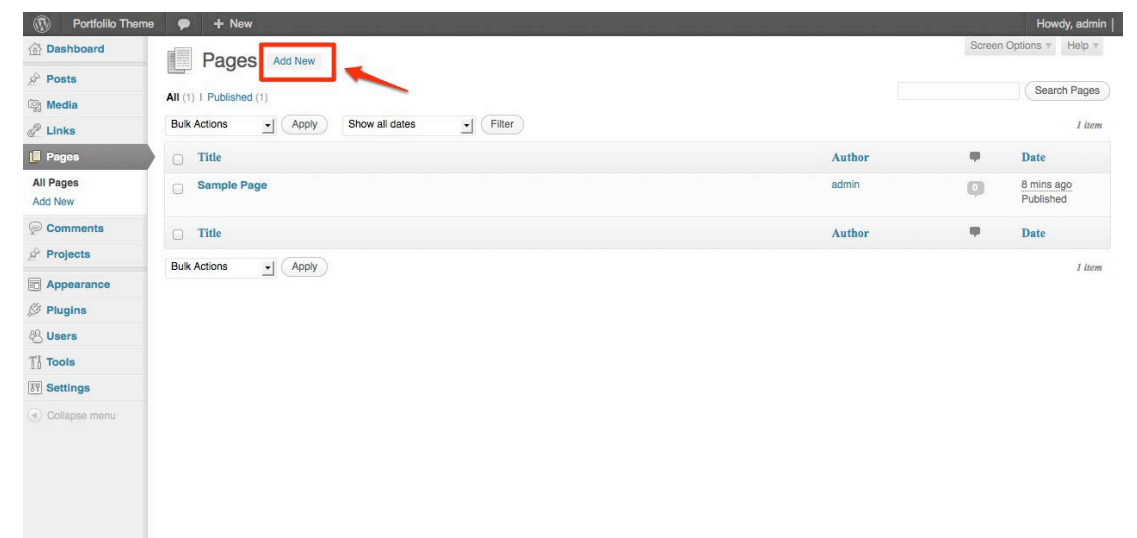

3. Click on „Upload“.

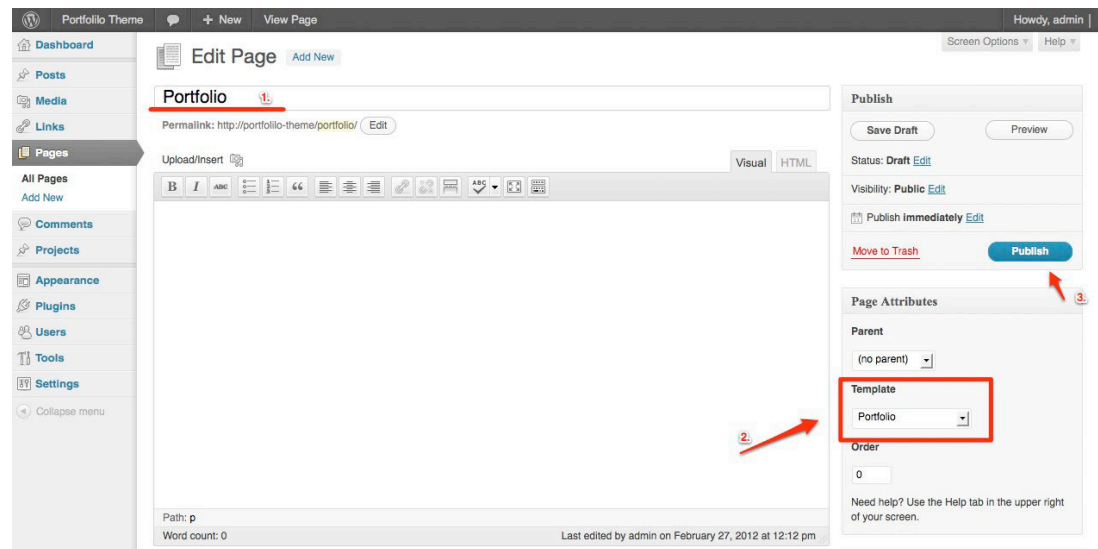

4. Search for the downloaded .zip-file on your harddrive, select and click „Install Now“.

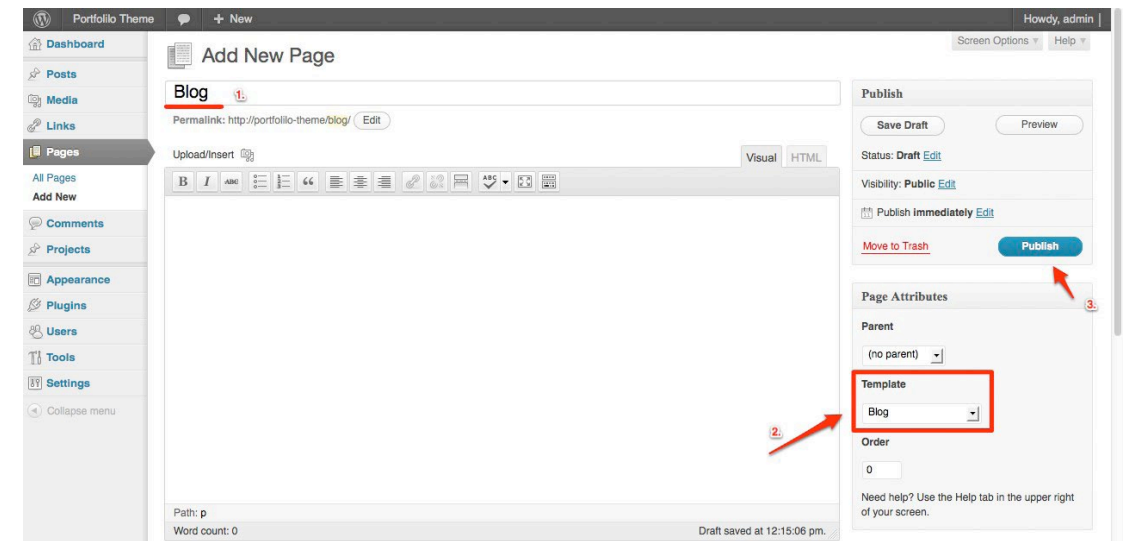

5. After the theme is uploaded click on active and the portfolilo is installed.

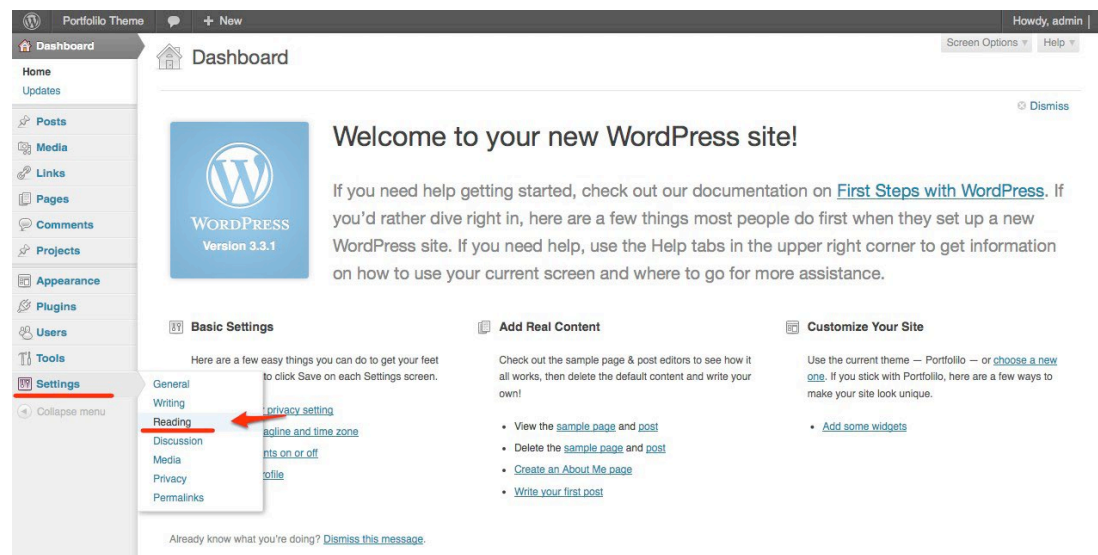

6. For the theme to work properly, you need to add a „blog“ and a „portfolio“ page. For that, in the wordpress menu, click on „Pages“ and then „Add New“.

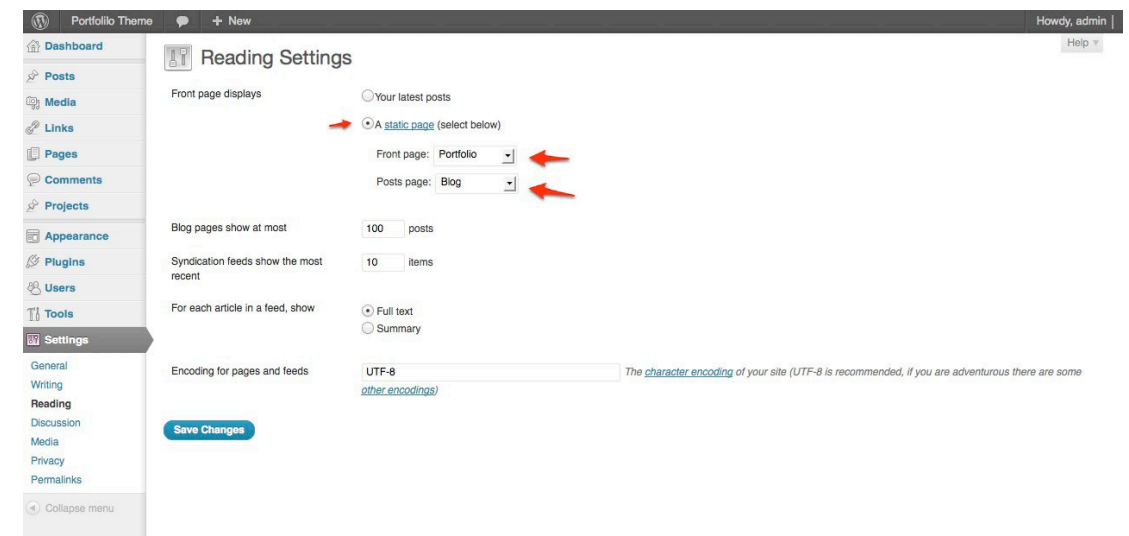

7. Create a new Page and name it „Portfolio“ or something similar. In the template box select „Portfolio“. When done click „Publish“.

8. Repeat the instruction from steps 6 to 7 and create a page with the name „Blog“ and the template „Blog“. When done click „Publish“.

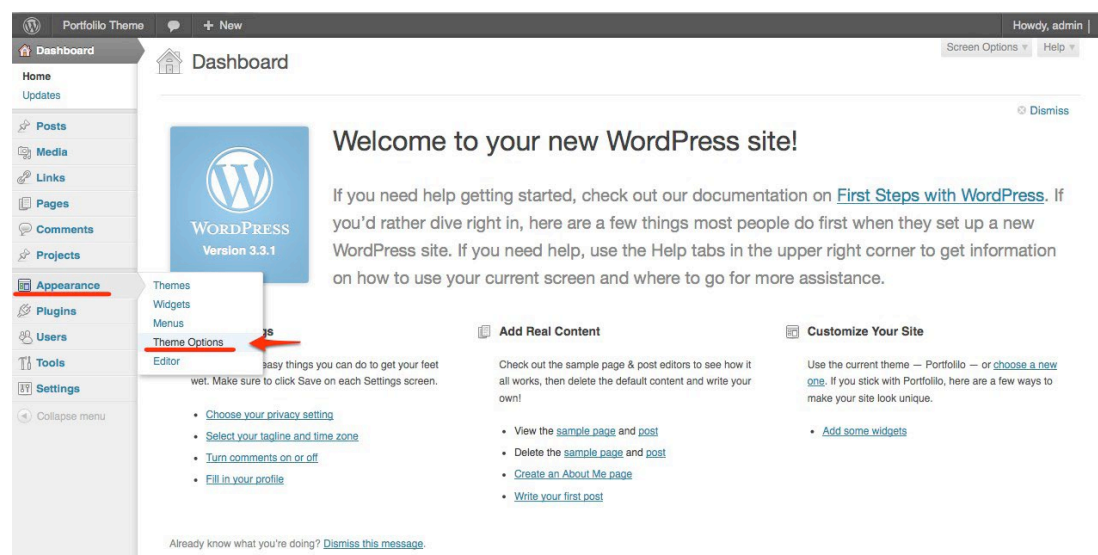

9. When the two pages are created go to Settings -> Reading in the wordpress menu.

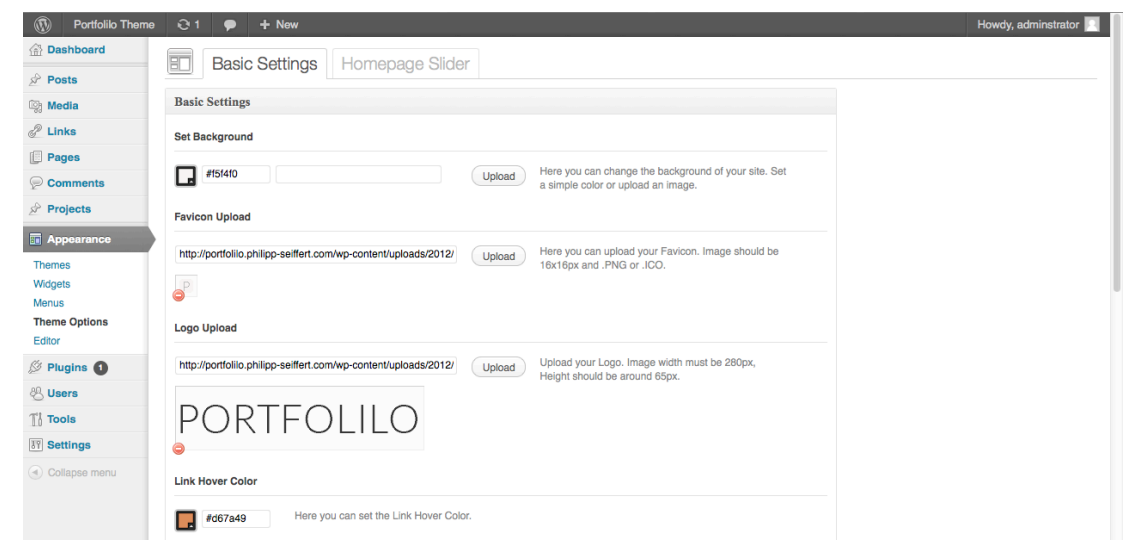

10. Set the checkbox to „A static page“ and choose the created page „Portfolio“ as Front Page and the „Blog“ Page as Posts Page. When done click „Save Changes“. Congratulations your done with the installation.

# CUSTOMIZATION

---

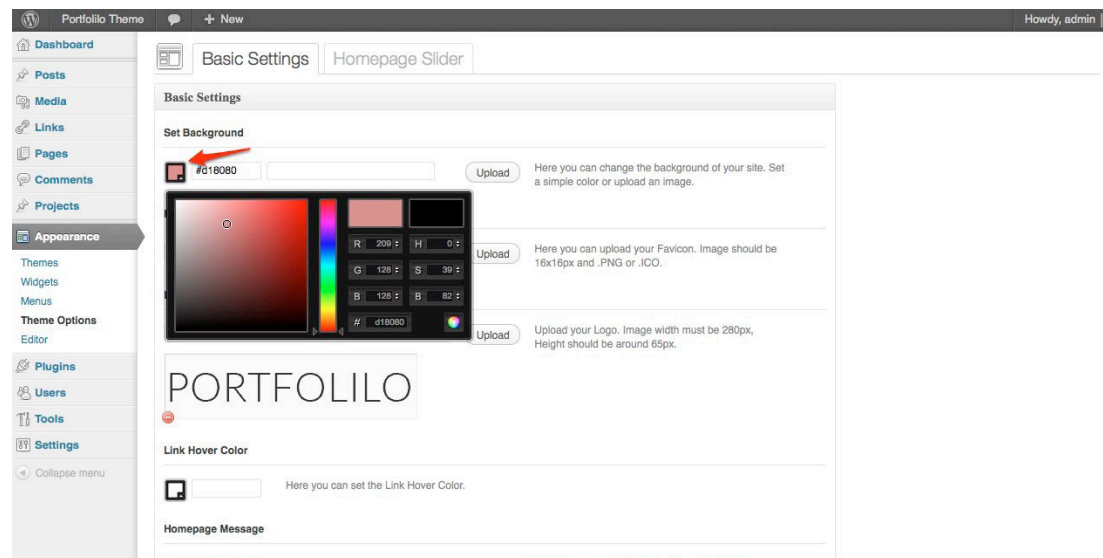

1. To change the appearance of your theme click on „Appearance“ -> „Theme Options“

2. Here you have the Basic Settings and the Slider Settings where you can customize your theme.

# BACKGROUND

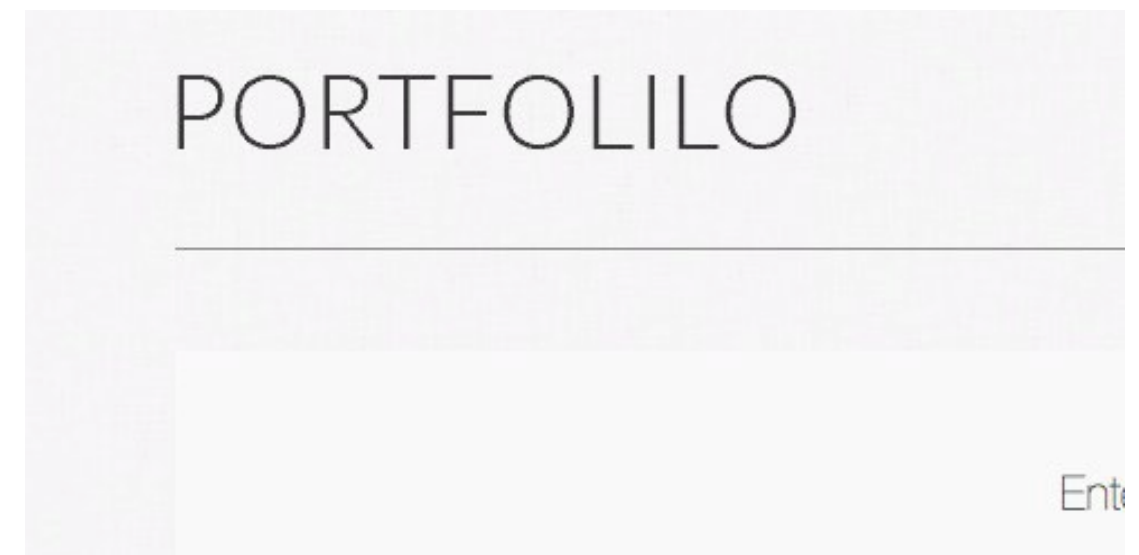

1. To change the background of your theme click on the colorpicker icon to set a color or click on „Upload“ and upload an image.

## simple background color

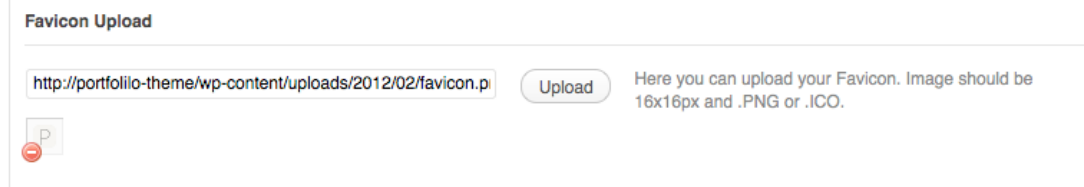

## background image

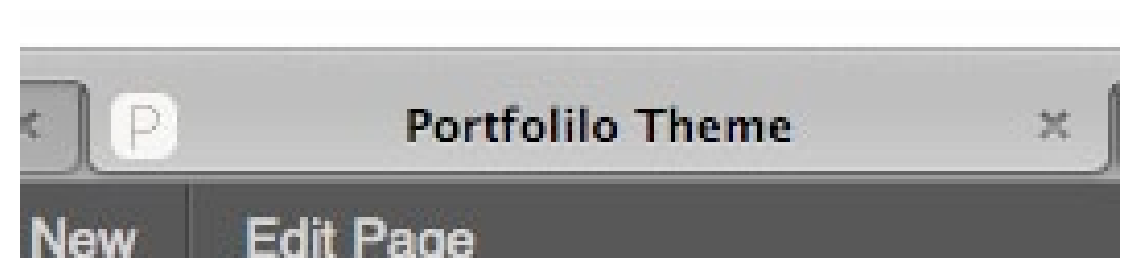

# FAVICON

---

1. To change the favicon of your site (the little icon which is displayed next to your url in the browser) just upload an image. It should be 16x16 Pixel and a .png or .ico-file.

## Favicon in the Browser
